SAAS APPLICATION USAGE REPORT

KEY FINDINGS

- **100%** SaaS applications in your network are unsanctioned
- Your SaaS usage is less than most Palo Alto Network Customers
- **100%** of SaaS users in your network use one or many unsanctioned SaaS applications
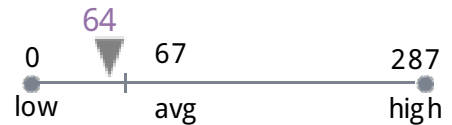

Top Applications

0 users of sanctioned SaaS apps
66 users of unsanctioned SaaS apps

The SaaS Application Usage Report summarizes actionable insight into SaaS application use in your organization for the 30 days captured in this report. Unsanctioned SaaS applications are SaaS Applications not approved or monitored by your security organizations. Unsanctioned applications could present a risk to your organization.
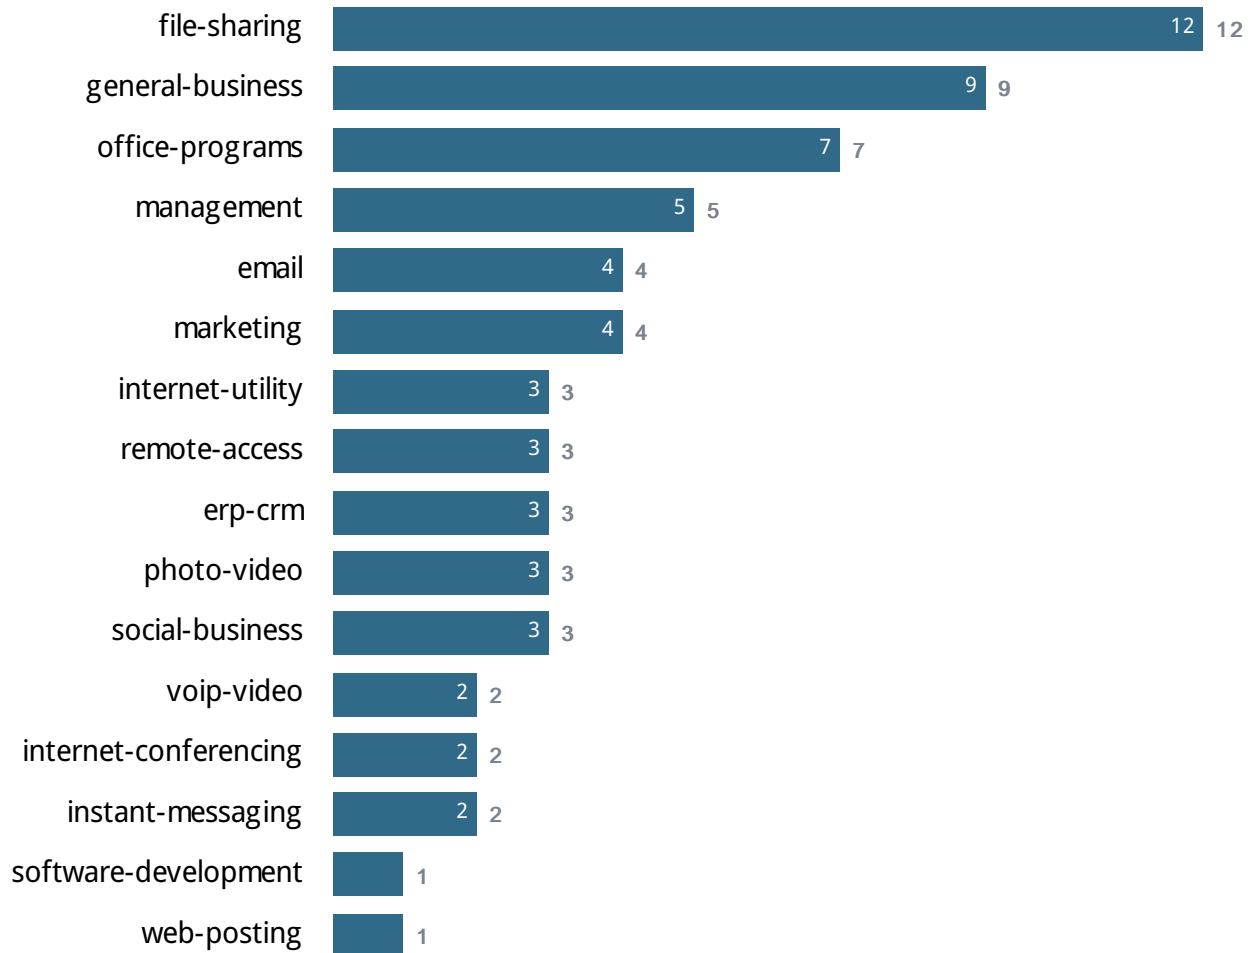

Applications by Subcategory

The graph below shows top SaaS application subcategories by total number of applications. The subcategories are sorted by total number of applications found in each subcategory.

Top SaaS application subcategories
by total number of applications

| Unsanctioned | Sanctioned |

| Subcategory	Count
file-sharing	12 12
general-business	9 9
office-programs	7 7
management	5 5
email	4 4
marketing	4 4
internet-utility	3 3
remote-access	3 3
